ALERT!™

ADVANCED LAYERED EMERGENCY RESPONSE TOOLS
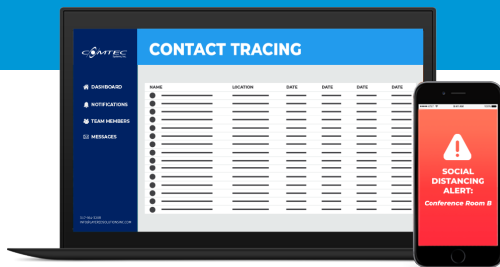

SOCIAL DISTANCE ALERTS

Keep people safe from harmful contaminants by automating social distance alerts across your facilities.

CONTACT TRACING

In the event of contamination, trace contacts instantly to identify those at risk and stop the chain of transmission.

OVERVIEW:

- Track the movement of people in your facilities.
- Automate alerts when people are too close for safety.
- Trace contacts via easy-to-use, searchable data in the event of contamination.
- Encourage safe habits and enhance employee awareness of health and safety procedures.
- Facilitate compliance with CDC guidance, industry or local regulations for reopening businesses.
- Fast and affordable rollout, using your existing RTLS system and integrating with various technologies you own.
- Purchase one or both modules.

CAPABILITIES	SOCIAL DISTANCE ALERTS	CONTACT TRACING
Track the movement of people in your facilities, enhancing your existing RTLS technology.	✓	✓
Automate alerts when people get too close for safety or exceed ideal room capacity.	✓
